13. *Mr. Jessiman*—Resolution—That financial assistance should be provided to needy students in our primary and secondary schools, as well as in university to ensure that no one is forced to drop out of the school system as a result of economic pressure.
18. *Mr. Peacock*—Resolution—That, in the opinion of this House, the Ontario Housing Corporation, in respect to the displacement of tenants from lands acquired directly or at arm's length by the corporation, should be subject to the provisions of The Expropriations Act, 1968-69, (Bill 5), in the same manner as the Crown.
27. *Mr. Brown*—Resolution—That, in the opinion of this House, persons on Old Age Security and/or welfare allowances and/or Unemployment Insurance should be carried free of charge on the GO train service.
28. *Mr. Newman* (Ontario South)—Resolution—That present highway traffic regulations which require a motorist to stop when approaching a school bus from either direction on any Ontario roadway with a speed limit in excess of 35 miles per hour is insufficient for the safety of elementary and secondary school children boarding and leaving school buses, and (a) that the regulation be amended to require motorists to come to a full stop when approaching a stopped school bus with flashing red lights regardless of the speed limit within the area, except on 4-lane controlled access roads, and remain stopped until the flashing red lights are disengaged, and (b) that the colour for school buses be standardized, preferably a Department of Highways yellow.
29. *Mr. Peacock*—Motion for return—For agreement between Ontario Housing Corporation and Montreal Trust Company effective May 1, 1969 respecting the Flemingdon Park and Tandridge public housing projects, and any associated papers showing the comparative costs of administrative, inside and outside maintenance and any other management services, apart from amortization costs, to be undertaken by Montreal Trust Company as against the cost of these services now provided by O.H.C. showing (a) the total cost, and (b) labour cost per unit or for each project.

32. *Mr. Shulman*—Resolution—That the report of the Ontario Securities Commission on Canadian Central Holdings be made public and that appropriate charges be laid as recommended in the report.
33. *Mr. Nixon*—Motion—Because of the resignation of the entire staff of the Indian Development Branch and the complete lack of policy and program put forward by the government in relation to Indian matters, this House has no confidence in the government, and in particular censures the Minister of Social and Family Services and believes his service in the government is no longer in the best interests of Ontario.

In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

13. *Mr. Jessiman*—Resolution—That financial assistance should be provided to needy students in our primary and secondary schools, as well as in university to ensure that no one is forced to drop out of the school system as a result of economic pressure.
18. *Mr. Peacock*—Resolution—That, in the opinion of this House, the Ontario Housing Corporation, in respect to the displacement of tenants from lands acquired directly or at arm's length by the corporation, should be subject to the provisions of The Expropriations Act, 1968-69, (Bill 5), in the same manner as the Crown.

28. *Mr. Newman* (Ontario South)—Resolution—That present highway traffic regulations which require a motorist to stop when approaching a school bus from either direction on any Ontario roadway with a speed limit in excess of 35 miles per hour is insufficient for the safety of elementary and secondary school children boarding and leaving school buses, and (a) that the regulation be amended to require motorists to come to a full stop when approaching a stopped school bus with flashing red lights regardless of the speed limit within the area, except on 4-lane controlled access roads, and remain stopped until the flashing red lights are disengaged, and (b) that the colour for school buses be standardized, preferably a Department of Highways yellow.

56. *Mr. Haggerty*—Enquiry of the Ministry—1. Is Carcinoma of the Left Middle Turbinate classified as an industrial disease. 2. On what grounds was claim No. S 7805085, Mr. Nelson Davison, aged 56, of R.R. No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production. What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. How are the Members of the Workmen's Compensation Board kept abreast of new hazards that might be expected to confront them in compensation cases. Is there a bulletin or journal advising them of new developments in these areas. 3. Will the Minister comment in particular on a letter dated April 3, 1969, addressed to the Medical Officer, Claims Department, Workmen's Compensation Board, 90 Harbour Street, Toronto, Ontario, with copy to Dr. Mastro-matteo in the Department of Health; relating to the case of Mr. Nelson Davison, age 56, of Rural Route No. 1, Port Colborne, Ontario; Workmen's Compensation Claim Number S 7805085; Diagnosis Carcinoma of the Left Middle Turbinate; letter signed by Dr. R. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

## PRIVATE MEMBERS' MOTIONS

5. *Mr. Sopha*—Resolution—That, in the opinion of this Legislature, it ought to be an offence for any person to eavesdrop on the conversation or actions of other parties by any means whatsoever, except under the strictest controls as prescribed by law.
13. *Mr. Jessiman*—Resolution—That financial assistance should be provided to needy students in our primary and secondary schools, as well as in university to ensure that no one is forced to drop out of the school system as a result of economic pressure.
18. *Mr. Peacock*—Resolution—That, in the opinion of this House, the Ontario Housing Corporation, in respect to the displacement of tenants from lands acquired directly or at arm's length by the corporation, should be subject to the provisions of The Expropriations Act, 1968-69, (Bill 5), in the same manner as the Crown.
27. *Mr. Brown*—Resolution—That, in the opinion of this House, persons on Old Age Security and/or welfare allowances and/or Unemployment Insurance should be carried free of charge on the GO train service.
28. *Mr. Newman* (Ontario South)—Resolution—That present highway traffic regulations which require a motorist to stop when approaching a school bus from either direction on any Ontario roadway with a speed limit in excess of 35 miles per hour is insufficient for the safety of elementary and secondary school children boarding and leaving school buses, and (a) that the regulation be amended to require motorists to come to a full stop when approaching a stopped school bus with flashing red lights regardless of the speed limit within the area, except on 4-lane controlled access roads, and remain stopped until the flashing red lights are disengaged, and (b) that the colour for school buses be standardized, preferably a Department of Highways yellow.
29. *Mr. Peacock*—Motion for return—For agreement between Ontario Housing Corporation and Montreal Trust Company effective May 1, 1969 respecting the Flemingdon Park and Tandridge public housing projects, and any associated papers showing the comparative costs of administrative, inside and outside maintenance and any other management services, apart from amortization costs, to be undertaken by Montreal Trust Company as against the cost of these services now provided by O.H.C. showing (a) the total cost, and (b) labour cost per unit or for each project.
32. *Mr. Shulman*—Resolution—That the report of the Ontario Securities Commission on Canadian Central Holdings be made public and that appropriate charges be laid as recommended in the report.

33. *Mr. Nixon*—Motion—Because of the resignation of the entire staff of the Indian Development Branch and the complete lack of policy and program put forward by the government in relation to Indian matters, this House has no confidence in the government, and in particular censures the Minister of Social and Family Services and believes his service in the government is no longer in the best interests of Ontario.
35. *Mr. Lawlor*—Motion—That the Minister of Health be called before the Committee on Privileges and Elections to explain his refusal to allow Members of this House entrance to institutions under his control.

(i) Have discussions taken place between the Department of Education and the O.N.T.C. regarding the possible use of its microwave link to carry television to Moosonee, and if so, with what result.
55. *Mr. Peacock*—Enquiry of the Ministry—1. On what grounds was claim No. S 7805085, Mr. Nelson Davison, aged 56, of R.R. No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production. What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. How are the Members of the Workmen's Compensation Board kept abreast of new hazards that might be expected to confront them in compensation cases. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

## PRIVATE MEMBERS' MOTIONS

5. *Mr. Sopha*—Resolution—That, in the opinion of this Legislature, it ought to be an offence for any person to eavesdrop on the conversation or actions of other parties by any means whatsoever, except under the strictest controls as prescribed by law.
13. *Mr. Jessiman*—Resolution—That financial assistance should be provided to needy students in our primary and secondary schools, as well as in university to ensure that no one is forced to drop out of the school system as a result of economic pressure.
18. *Mr. Peacock*—Resolution—That, in the opinion of this House, the Ontario Housing Corporation, in respect to the displacement of tenants from lands acquired directly or at arm's length by the corporation, should be subject to the provisions of The Expropriations Act, 1968-69, (Bill 5), in the same manner as the Crown.
27. *Mr. Brown*—Resolution—That, in the opinion of this House, persons on Old Age Security and/or welfare allowances and/or Unemployment Insurance should be carried free of charge on the GO train service.
28. *Mr. Newman* (Ontario South)—Resolution—That present highway traffic regulations which require a motorist to stop when approaching a school bus from either direction on any Ontario roadway with a speed limit in excess of 35 miles per hour is insufficient for the safety of elementary and secondary school children boarding and leaving school buses, and (a) that the regulation be amended to require motorists to come to a full stop when approaching a stopped school bus with flashing red lights regardless of the speed limit within the area, except on 4-lane controlled access roads, and remain stopped until the flashing red lights are disengaged, and (b) that the colour for school buses be standardized, preferably a Department of Highways yellow.
29. *Mr. Peacock*—Motion for return—For agreement between Ontario Housing Corporation and Montreal Trust Company effective May 1, 1969 respecting the Flemington Park and Tandridge public housing projects, and any associated papers showing the comparative costs of administrative, inside and outside maintenance and any other management services, apart from amortization costs, to be undertaken by Montreal Trust Company as against the cost of these services now provided by O.H.C. showing (a) the total cost, and (b) labour cost per unit or for each project.
32. *Mr. Shulman*—Resolution—That the report of the Ontario Securities Commission on Canadian Central Holdings be made public and that appropriate charges be laid as recommended in the report.

33. *Mr. Nixon*—Motion—Because of the resignation of the entire staff of the Indian Development Branch and the complete lack of policy and program put forward by the government in relation to Indian matters, this House has no confidence in the government, and in particular censures the Minister of Social and Family Services and believes his service in the government is no longer in the best interests of Ontario.
35. *Mr. Lawlor*—Motion—That the Minister of Health be called before the Committee on Privileges and Elections to explain his refusal to allow Members of this House entrance to institutions under his control.

(i) Have discussions taken place between the Department of Education and the O.N.T.C. regarding the possible use of its microwave link to carry television to Moosonee, and if so, with what result.

On what grounds was claim No. S 7805085, Mr. Nelson Davison, aged 56, of R.R. No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production. What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. How are the Members of the Workmen's Compensation Board kept abreast of new hazards that might be expected to confront them in compensation cases. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

18. *Mr. Peacock*—Resolution—That, in the opinion of this House, the Ontario Housing Corporation, in respect to the displacement of tenants from lands acquired directly or at arm's length by the corporation, should be subject to the provisions of The Expropriations Act, 1968-69, (Bill 5), in the same manner as the Crown.

56. *Mr. Haggerty*—Enquiry of the Ministry—1. Is Carcinoma of the Left Middle Turbinate classified as an industrial disease. 2. On what grounds was claim No. S 7805085, Mr. Nelson Davison, aged 56, of R.R. No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production. What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. How are the Members of the Workmen's Compensation Board kept abreast of new hazards that might be expected to confront them in compensation cases. Is there a bulletin or journal advising them of new developments in these areas. 3. Will the Minister comment in particular on a letter dated April 3, 1969, addressed to the Medical Officer, Claims Department, Workmen's Compensation Board, 90 Harbour Street, Toronto, Ontario, with copy to Dr. Mastro-matteo in the Department of Health; relating to the case of Mr. Nelson Davison, age 56, of Rural Route No. 1, Port Colborne, Ontario; Workmen's Compensation Claim Number S 7805085; Diagnosis Carcinoma of the Left Middle Turbinate; letter signed by Dr. R. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.

57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

56. *Mr. Haggerty*—Enquiry of the Ministry—1. Is Carcinoma of the Left Middle Turbinate classified as an industrial disease. 2. On what grounds was claim No. S 7805085, Mr. Nelson Davison, aged 56, of R.R. No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production.

What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.

57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. How are the Members of the Workmen's Compensation Board kept abreast of new hazards that might be expected to confront them in compensation cases. Is there a bulletin or journal advising them of new developments in these areas. 3. Will the Minister comment in particular on a letter dated April 3, 1969, addressed to the Medical Officer, Claims Department, Workmen's Compensation Board, 90 Harbour Street, Toronto, Ontario, with copy to Dr. Mastro-matteo in the Department of Health; relating to the case of Mr. Nelson Davison, age 56, of Rural Route No. 1, Port Colborne, Ontario; Workmen's Compensation Claim Number S 7805085; Diagnosis Carcinoma of the Left Middle Turbinate; letter signed by Dr. R. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production.

What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.

57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."
58. *Mr. Peacock*—Enquiry of the Ministry—1. Is the inclusion of a day care centre in the builder proposals for the first phase of the Chapel Glen Village condominium development a condition of acceptance of a proposal by OHC. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production.

What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.

57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."
58. *Mr. Peacock*—Enquiry of the Ministry—1. Is the inclusion of a day care centre in the builder proposals for the first phase of the Chapel Glen Village condominium development a condition of acceptance of a proposal by OHC. If not, why not. 2. What portion of the \$25,000,000 cost of construction of the first phase will be provided out of the 1969-70 advance to OHC. 3. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between 1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between

1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

13. *Mr. Jessiman*—Resolution—That financial assistance should be provided to needy students in our primary and secondary schools, as well as in university to ensure that no one is forced to drop out of the school system as a result of economic pressure.
18. *Mr. Peacock*—Resolution—That, in the opinion of this House, the Ontario Housing Corporation, in respect to the displacement of tenants from lands acquired directly or at arm's length by the corporation, should be subject to the provisions of The Expropriations Act, 1968-69, (Bill 5), in the same manner as the Crown.
27. *Mr. Brown*—Resolution—That, in the opinion of this House, persons on Old Age Security and/or welfare allowances and/or Unemployment Insurance should be carried free of charge on the GO train service.
29. *Mr. Peacock*—Motion for return—For agreement between Ontario Housing Corporation and Montreal Trust Company effective May 1, 1969 respecting the Flemingdon Park and Tandridge public housing projects, and any associated papers showing the comparative costs of administrative, inside and outside maintenance and any other management services, apart from amortization costs, to be undertaken by Montreal Trust Company as against the cost of these services now provided by O.H.C. showing (a) the total cost, and (b) labour cost per unit or for each project.

55. *Mr. Peacock*—Enquiry of the Ministry—1. 56. *Mr. Haggerty*—Enquiry of the Ministry—1. Is Carcinoma of the Left Middle Turbinate classified as an industrial disease. 2. On what grounds was claim No. S 7805085, Mr. Nelson Davison, aged 56, of R.R. No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production. What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. How are the Members of the Workmen's Compensation Board kept abreast of new hazards that might be expected to confront them in compensation cases. Is there a bulletin or journal advising them of new developments in these areas. 3. Will the Minister comment in particular on a letter dated April 3, 1969, addressed to the Medical Officer, Claims Department, Workmen's Compensation Board, 90 Harbour Street, Toronto, Ontario, with copy to Dr. Mastro-matteo in the Department of Health; relating to the case of Mr. Nelson Davison, age 56, of Rural Route No. 1, Port Colborne, Ontario; Workmen's Compensation Claim Number S 7805085; Diagnosis Carcinoma of the Left Middle Turbinate; letter signed by Dr. R. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between

1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

Would the Minister spell out his Department's current program and philosophy for the treatment of emotionally disturbed children who come to the attention of the Department from its various agencies and branches, specifically Indian children, children of those people who are recipients of General Welfare Assistance, children referred by the Children's Aid Societies, etc. 13. Does the Minister's Department make a distinction between retarded children and emotionally disturbed children. 14. If so, would the Minister define the distinction and/or difference, as reflected in the programs for treating these children. 15. Has the Minister done anything to assess the current incidence of emotional disturbance, and identify areas, age groups and locations of greatest need. 16. What is the role of the Deputy Minister of Child Welfare in (a) defining regulations; (b) establishing policies; and (c) exerting political intervention in the determination of placements or rejections of placements of children who are emotionally disturbed. 17. Would the Minister define the "authority chain" within his Department, with special attention to the Department of Child Welfare, defining who is answerable to whom, who takes directions from whom, and who establishes economic priorities and long-range plans. 18. What was the amount of money spent by the Department in the years 1967, 1968 and 1969 on Public Relations Services Ltd., regarding Warrendale, Brown Camps, Browndale and John Brown. 19. What is the number of inspectors from the office of the Director of Institutions who supervise the care and treatment of children in the various centres. 10. Would the Minister designate who is responsible for assessing the appropriateness of placement, the readiness for discharge, the need for special therapeutic assistance, the need for special educational programs or other specialized needs that children may have, from time to time, within the institutions. 11. Would the Minister indicate the form in which these assessments are made. 12. How many Indian children are there in the reform institutions. 13. What are the home communities of these children. 14. 56. *Mr. Haggerty*—Enquiry of the Ministry—1. Is Carcinoma of the Left Middle Turbinate classified as an industrial disease. 2. On what grounds was claim No. S 7805085, Mr. Nelson Davison, aged 56, of R.R. No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production. What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. How are the Members of the Workmen's Compensation Board kept abreast of new hazards that might be expected to confront them in compensation cases. Is there a bulletin or journal advising them of new developments in these areas. 3. Will the Minister comment in particular on a letter dated April 3, 1969, addressed to the Medical Officer, Claims Department, Workmen's Compensation Board, 90 Harbour Street, Toronto, Ontario, with copy to Dr. Mastro-matteo in the Department of Health; relating to the case of Mr. Nelson Davison, age 56, of Rural Route No. 1, Port Colborne, Ontario; Workmen's Compensation Claim Number S 7805085; Diagnosis Carcinoma of the Left Middle Turbinate; letter signed by Dr. R. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between

1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

18. *Mr. Peacock*—Resolution—That, in the opinion of this House, the Ontario Housing Corporation, in respect to the displacement of tenants from lands acquired directly or at arm's length by the corporation, should be subject to the provisions of The Expropriations Act, 1968-69, (Bill 5), in the same manner as the Crown.

56. *Mr. Haggerty*—Enquiry of the Ministry—1. Is Carcinoma of the Left Middle Turbinate classified as an industrial disease. 2. On what grounds was claim No. S 7805085, Mr. Nelson Davison, aged 56, of R.R. No. 1, Port Colborne, Ontario, an employee of the International Nickel Company, Port Colborne, disallowed by the Workmen's Compensation Board. 3. In what departments of the company did Mr. Nelson Davison work. 4. How were these departments shielded from airborne carcinogens. 5. What are the implications of this disqualification, touching on all employees, such as progress chasers, who move about industrial operations, and who sometimes work in the office and sometimes are in the plant. 6. How well informed is the Board on the incidence of new research in regard to possible employment hazards in industrial production. What liaison exists with the Department of Health in this regard. 7. To what learned journals did the Board subscribe in the last complete year for which records are available. Please tabulate.
57. *Mr. Haggerty*—Enquiry of the Ministry—1. With respect to workers being exposed to new materials that are proving to be carcinogens, what continuing steps is the Minister of Health taking to evaluate new materials in this regard, and to re-evaluate older, more traditional materials in the light of new knowledge as to their carcinogenic and other hazardous properties. 2. What continuing liaison exists between the Research Laboratory of the Department of Health and the Workmen's Compensation Board in this regard. How are the Members of the Workmen's Compensation Board kept abreast of new hazards that might be expected to confront them in compensation cases. G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between

1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

G. C. MacLaren, FRCS, DMRT, The Ontario Cancer Foundation, Hamilton Clinic. 4. In particular will the Minister of Health comment on the following passages from the letter: "I know nothing of the details of the processes of refining nickel, but I do know that this type of tumour is unusual in the general population. This clinic sees patients from Hamilton, Burlington, Guelph, Galt, Brantford and the Niagara Peninsula, and between

1958 and 1967, we have records of nine cases in males. Their towns of origin are: Port Colborne, 6; Fort Erie, 1; Welland, 1; Wellandport, 1. I have no way of knowing that these nine cases all worked at the International Nickel Company, although some certainly did. We have other cases of women who are scattered on a more random basis, and I am surprised that we have no other cases of males from the rest of our area, as we should have one or two cases from large cities like Hamilton. As this patient has worked at the International Nickel plant for many years and as the disease from which he suffers seems to be uncommon elsewhere, I think it would probably be advisable to review the decision regarding this claim."

95. *Mr. Reid* (Scarborough East)—Enquiry of the Ministry—What are the comparable estimates of the Department of Education for 1969-70 in terms of the 1968-69 votes and items? That is to say, using the budgeting and accounting categorization of the 1968-69 Estimates which included 22 separate votes (501 to and including 522) what are the estimated increased or decreased expenditures for 1969-70 which could be validly compared to each of the 1968-69 votes and items in each vote? For example, what is the real comparison for 1969-70 to vote 506 (with 7 items) in 1968-69 entitled "Information Branch"?
